## 4 in a Row - Chanukah

This game is for 2 players or 4 players (if they play in pairs).

Place the board in the centre. Give each player a set of coloured discs (red and blue), or chocolate money (gold and silver).  
Shuffle the picture cards and place them face down in the centre.

Each player in turn, turns over a card, reads the question (from the board) for that particular card and answers the question.

For example: If the student turns over 'a top' the student reads from the board: **Top-What colour is it?**  
The student answers, "The top is red". That student covers one of the **Top-What colour is it?** squares with a disc.

It is the next player's turn to turn over a card and cover a square with the matching question.

The winner is the player who can place four discs in a row, either horizontally, vertically or diagonally.
